

How to Keep *Your* Finger Scanners Clean

identiMetrics™

Cheat Sheet

By using recommendations from the CDC along with Best Practices recommendations from identiMetrics, your finger scanners can be the most hygienic spots your students and staff touch all day!

Best Practices for keeping hands clean

- Wash hands thoroughly with soap and warm water for 20 seconds.
- You can also use an alcohol-based hand sanitizer with at least 70% alcohol.
- Remind students and staff to avoid touching their eyes, noses, and mouths.

Best Practices for keeping finger scanners clean and disinfected

- Use alcohol wipes or a soft paper towel moistened with rubbing alcohol.
- Gently clean off the finger scanner.
- Dry immediately with another paper towel or just air dry.
- Sterilize the finger scanners periodically throughout the day.

Best Practices for scanning

- Maintain the recommended distance between people.
- Touch the finger to a sponge moistened with an alcohol solution or an alcohol wipe.
- Touch the finger to a paper towel to dry.
- Touch the finger to the scanner to scan.
